

A Guide to Editing the Description on Your *DIY* Fundraising Page

On your personal *DIY Fundraising Page*, you can add text to make the page more personal and tell the story of your project to your friends and family. Share why you love nature and want to protect it.

The screenshot shows the editing interface for a Nature Canada DIY Fundraising Page. On the left, there is a green "MANAGE PAGE" button. Below it, the "Fundraising Goal" is set to "\$300" with a blue pencil icon for editing. Underneath, the text "Special Thanks To" is visible. The main editing area on the right has a title "Take Root, Nurture Nature" with a green arrow pointing to a blue pencil icon. Below the title is a rich text editor with a toolbar containing options for font sizes, bold, italic, underline, text color, background color, bulleted list, numbered list, and image insertion. The text area contains the prompt: "Tell your story here! What DIY fundraiser will you be doing? Why do you love nature? Why are you doing this fundraiser to protect and restore more nature? What is your favourite thing about spending time in nature? Why do you think it is important to take action to protect nature and wildlife?". Below this text is a placeholder for a photo with the text "Add Photo Here by Selecting this Button" and a small image icon. At the bottom of the editor is a text input field with the letter "p". To the right of the editor are two buttons: "Update" with a green checkmark and "Cancel" with a red X.

Tell your story! Get a bit personal. What inspired you to take a stand, tell your friends and family why you think it is important enough to donate your time and funds to restore nature. What is your personal connection with the cause? Share on your fundraiser page- Why do you love nature, why are you doing this project to protect and restore more nature?

Edit the description text by clicking on the blue pencil button to edit
