### 4. Start your fundraising off right by giving a gift yourself.

**Give a gift to yourself!** Lead by example. The first donation should be your own. An opening tally above \$20 is a great start! Planting the first seed by gifting your own donation and leading by example has an escalating effect. Your friends and family are more likely to give if they see you personally donated as well.

## 5. Create your Fundraising Page.

Your Page Name will become your Page URL for the website. – Get Creative and Stay Simple

Set an easy goal and raise it later. Start with a goal of \$300 and once you approach it, raise the goal a bit higher! Beating the goal is something you can share on social media to encourage more donations.

The Set Tag is Take Root, Nurture Nature. You can change that to whatever you like.

Tell your story here! What Grow Green @ Home project will you be doing? Why do you love nature? Why are you doing this project to protect and restore more nature? What is your favourite thing about spending time in nature? Why do you think it is important to take action to protect nature and wildlife?

There is also information about Nature Canada at the bottom of your page so your friends and family can learn a little about what their donations will support.
