

Week Two Challenge: Light Up the Night

Constellation Search

What you'll need:

- Star map
- Picnic blanket and pillow

Steps

1. Print these instructions with the star map below. You can also download onto your phone or tablet to go paperless!
2. Find a spot outside where you can see the stars.
3. Set up your stargazing station with your picnic blanket and pillow.
4. Use the star map to find as many constellations as you can!
5. Don't forget to snap a picture or video of your stargazing adventure and share on social media with #CampOut, tagging @campoochigeas and @camptrillium!

Helpful hints

- You can turn any spot into a stargazing station, but try to find a place without light pollution—this means as little light as possible from houses, buildings, and street lights. This makes it easier to see the stars!
- To make your stargazing station extra cozy, you could bring lawn chairs and snacks—we recommend hot chocolate!
- In addition to our star map, there are lots of great star-finding apps available that make it even easier to find the stars from wherever you are.
- If you can't see the stars at first, don't worry—it can take a few minutes for your eyes to get used to the dark!
