

# Week Five Challenge: Creation Station

## Make a braid

### Steps

1. Find three strips of fabric. They can be any combination of colours you like and each should be about a metre long.
2. Stretch them out and tie the tops of the three strands together in a knot. Be sure to leave extra fabric at the end of the knot so you can tie the two ends together when you are finished!
3. Starting just below the knot begin to braid the three strips of fabric together.
4. Once you get to the end of your fabric strips, tie another knot to close off the braid. Now, tie your two loose ends together—you're done!
5. Don't forget to snap a picture or video of your braid and share on social media with #CampOut, tagging @campoochigas and @camptrillium!
