

Wreath Making:

Once all of the paper leaves are cut out, written on and decorated, begin gluing the leaves to a cardboard ring. Use only a small amount of glue at the base of the leaf so to maintain a 3D effect and layer the leaves. Fluff the leaves a little so they did not appear so flat.

Continue sticking the leaves all the way around the ring until the cardboard is covered. Use the red decorations to make it look like a Christmas wreath.

Hang the wreath, using string or hessian, in the main entrance of your school, parish, or classroom door as a reminder of the hope for the year ahead.
